Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35 and 42-48 are drawn to a method for identifying a compound that regulates the activity of autoinducer-2, classified in class 435, various subclasses.
- II. Claims 36-41 are drawn to a method of detecting an autoinducer-associated bacterial biomarker, classified in class 435, various subclasses.
- III. Claims 49-51 are drawn to a method for producing autoinducer-2, classified in class 560, subclass 562.
- IV. Claims 52-79 are drawn to an antibiotic composition comprising an antibiotic and an inhibitor of the quorum-sensing pathway of a microorganism, classified in class 514, subclass 461.
- V. Claims 80-95 are drawn to a method of treating infections in a warm-blooded animal with a composition, classified in class 514, subclasses 31, 192, 199 and 461.
- VI. Claims 96-98 are drawn to a medical device, classified in class 126, various subclasses.

The six inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their different classification and

a separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.
